

Options for Halstead Road

There is currently an informal entrance at the end of Halstead Road. It is narrow, but could be made to be accessible to wheel chair users, while the kissing gate could assist in the exclusion of unauthorised vehicle and horse access.

The options here might be:

1. Leave as it is.
2. Formalise the entrance with the installation of "Estate" railings and a kissing gate and a welcome sign, including information on the site. The access here is suitable for creating an incline to allow disabled access at this point.
3. Repair the gap by raising the bank with wire, stone and soil Gabions (which would become covered in Ivy and hidden), and estate railing fence. Thus preventing access at this point.
